NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Rule 71.1)

Date of mailing
(day/month/year)

31.03.2005

Applicant's or agent's file reference
PE-0720

IMPORTANT NOTIFICATION

International application No.
PCT/BR 03/00199

International filing date (day/month/year)
19.12.2003

Priority date (day/month/year)
14.01.2003

Applicant
COMPANHIA BRASILEIRA DE METALURGIA... et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/BR 03/00199

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, Pages

1-6 as originally filed

Claims, Numbers

1-2 as originally filed

Drawings, Sheets

1/1 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/BR 03/00199

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims	1-2 yes
	No: Claims	
Inventive step (IS)	Yes: Claims	
	No: Claims	1-2 no
Industrial applicability (IA)	Yes: Claims	1-2 yes
	No: Claims	

2. Citations and explanations

see separate sheet

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/BR 03/00199

To point V:

1) Reference is made to the following documents:

D1: DE-C-4309701	D2: US-B1-6333288
D3: WO-A-9219559	D4: WO-A-0009456
D5: US-B1-6184166	D6: EP-A-0594422.

2) Inventive step

2a) Closest prior art document is D1 (page 2, line 1-6; page 3, line 24-26; claim 1) discloses a lead-free crystal glass composition exhibiting

- a density greater than 2,45 g/cm³ and
- a refractory index n_d of greater than 1,52

with the following composition

		(present application)
SiO ₂	50-75 wt%	50-75
Na ₂ O	2-15 wt%	5-10
K ₂ O	1-15 wt%	5-15
CaO	3-12 wt%	3-12
BaO	1-10 wt%	0,1-5
Nb ₂ O ₅	0,1- 5 wt%	0,1- 10,

from which the glass according to the present application that Nb₂O₅ is up to 10 wt%.

The positive effect of Nb₂O₅ (in a range of e.g. 6-12 wt%) on the desired optical position, in particular low Abbe numbers and at the same time a high refractive index in lead-free crystal glass of the type SiO₂-Na₂O-K₂O-B₂O₃-CaO-BaO-TiO₂ is known from D2 (column 3, line 7-19; claims 1-10).

The person skilled in the art whose aim is to achieve a lead-free crystal glass with improved refraction index (>1,51) would start from the lead-free crystall glass disclosed in D1 and for improving the desired optical properties take into consideration D2 and find out by simple testing the most appropriate glass composition.

Accordingly, claims 1 and 2 of the present application do not fulfil the requirements of Article 33(3) PCT.
